NextAsk Gateway — API Documentation

Base URL: https://nextaskgw.automationedge.com | **Auth Scheme:** Basic Auth & X-API-Key

Overview: Integration specification for the **Authorization API** (/api/authorize) and the **Alert Intake API** (/api/alerts). Clients first authenticate with credentials to receive the active api_key, then pass it via X-API-Key to trigger automated multi-lingual Twilio voice calls.

1. Authorization API (/api/authorize)

Method: POST / GET **Endpoint:** https://nextaskgw.automationedge.com/api/authorize

Request Headers & Credentials

Header	Example Value	Required	Description
Authorization	Basic <base64_encoded_credentials>	Yes (or body)	Base64 encoded <username>:<password>
Content-Type	application/json	Conditional	Required if passing JSON body

Request Body (Optional if using HTTP Basic Auth)

```
{
  "username": "<YOUR_USERNAME>",
  "password": "<YOUR_PASSWORD>"
}
```

Success Response (200 OK)

```
{
  "status": "success",
  "authorized": true,
  "http_code": 200,
  "message": "User authenticated successfully. Use the provided api_key in the headers of other APIs.",
  "api_key": "<YOUR_API_KEY>",
  "x_api_key": "<YOUR_API_KEY>",
  "token": "<SESSION_BEARER_TOKEN>",
  "token_type": "Bearer",
  "expires_in": 86400,
  "user": { "username": "<YOUR_USERNAME>", "role": "admin", "auth_type": "credentials" }
}
```

2. Alert Intake API (/api/alerts)

Method: POST **Endpoint:** https://nextaskgw.automationedge.com/api/alerts

Request Headers

Header	Value	Required	Description
X-API-Key	<YOUR_API_KEY>	Yes	Security key obtained from /api/authorize
Content-Type	application/json	Yes	JSON payload specification

Request Body (JSON Payload to Pass in Request Body)

```
{
  "batch_id": "BATCH002",
  "event_timestamp": "2026-11-02T16:30:00+03:00",
  "branch": {
    "branch_id": "BR002",
    "branch_name": "Jeddah Regional Office",
    "site_number": "SITE002"
  },
  "alerts": [
    {
      "event_id": "EVT002",
      "event_type": "ASSIGNMENT_CREATED",
      "event_version": 1,
      "alert_id": "ALT1002",
      "ticket": {
        "ticket_id": "INC1002",
        "alarm_id": "ALM5002",
        "issue_description": "Router interface down - high packet loss",
        "alarm_type": "Hardware Alert",
        "severity": "Major",
        "ticket_status": "Assigned",
        "alarm_status": "Active"
      },
      "assignment": {
        "assignment_id": "ASN010",
        "assignment_type": "INITIAL",
        "assigned_at": "2026-11-02T16:30:00+03:00"
      },
      "technician": {
        "technician_id": "ENG010",
        "name": "Ali",
        "mobile_number": "+9665XXXXXXXX",
        "preferred_language": "English"
      },
      "team_leader": {
        "team_leader_id": "TL002",

        "description": "Router interface down - high packet loss",
        "technician_name": "Ali",
        "technician_number": "+9665XXXXXXXX"
      }
    }
  ]
}
```

3. Alert Intake Payload Field Specifications

The table below details all fields present in the request body payload. Data types are mapped directly from the production PostgreSQL schema (tb_tickets, tb_nextask_events, tb_assignments). Fields marked with **[Additional Field]** denote extensions introduced in this architecture.

Field Name	PostgreSQL Data Type	Sample Value	Purpose / Description	Note
batch_id	VARCHAR(50)	BATCH002	Identify and group a batch of alerts	**[Additional Field]**
event_timestamp	TIMESTAMP WITH TIME ZONE	2026-11-02T16:30:00+03:00	Record root batch generation timestamp	**[Additional Field]**
branch.branch_id	VARCHAR(50)	BR002	Unique identifier of the facility / branch	**[Additional Field]**
branch.branch_name	VARCHAR(150)	Jeddah Regional Office	Physical facility / branch name	Standard
branch.site_number	VARCHAR(50)	SITE002	Site code / branch number	Standard
alerts[].event_id	VARCHAR(50)	EVT002	Unique event identifier for idempotency	Standard
alerts[].event_type	VARCHAR(60)	ASSIGNMENT_CREATED	Dispatch lifecycle action (CREATED / REASSIGNED)	Standard
alerts[].event_version	BIGINT	1	Sequence / revision version number	Standard
alerts[].alert_id	VARCHAR(50)	ALT1002	Separate alert reference distinct from ticket	**[Additional Field]**
alerts[].ticket.ticket_id	VARCHAR(50)	INC1002	Primary incident ticket reference number	Standard
alerts[].ticket.alarm_id	VARCHAR(50)	ALM5002	Monitoring sensor / alarm system ID	Standard
alerts[].ticket.issue_description	TEXT	Router interface down - high packet loss	Problem description read to technician in call	Standard
alerts[].ticket.alarm_type	VARCHAR(100)	Hardware Alert	Classification of alarm (Power, HVAC, Network)	Standard
alerts[].ticket.severity	VARCHAR(30)	Major	Ticket priority (Critical, Major, Minor)	Standard
alerts[].ticket.ticket_status	VARCHAR(50)	Assigned	Current lifecycle status of the ticket	Standard
alerts[].ticket.alarm_status	VARCHAR(50)	Active	Alarm sensor state (Active, Resolved)	Standard
alerts[].assignment.assignment_id	VARCHAR(50)	ASN010	Current dispatch assignment ID	Standard
alerts[].assignment.assignment_type	VARCHAR(30)	INITIAL	Assignment type: INITIAL or REASSIGNMENT	**[Additional Field]**
alerts[].assignment.previous_assignment_id	VARCHAR(50)	null / ASN001	Prior assignment ID (omit for INITIAL, required for REASSIGNMENT)	**[Additional Field]**
alerts[].assignment.assigned_at	TIMESTAMP WITH TIME ZONE	2026-11-02T16:30:00+03:00	Timestamp when assignment was made	**[Additional Field]**
alerts[].technician.technician_id	VARCHAR(50)	ENG010	Field technician employee / staff code	Standard
alerts[].technician.name	VARCHAR(150)	Ali	Technician full name	Standard
alerts[].technician.mobile_number	VARCHAR(30)	+9665XXXXXXXX	Phone number dialed for primary call	Standard
alerts[].technician.preferred_language	VARCHAR(20)	English	Preferred call IVR voice language	Standard
alerts[].team_leader.*	JSONB / VARCHAR	Mohammed (+9665XXXXXXXX)	1st escalation contact dialed if tech misses call	Standard
alerts[].manager.*	JSONB / VARCHAR	Khalid (+9665XXXXXXXX)	2nd escalation contact dialed if TL misses call	Standard
